

B100 Glue Spray Heavy Duty

PRODUCT DESCRIPTION

B100 is a heavy duty contact glue with an extremely fast tack. Suitable for the fast, clean, easy and economically bonding and assembling of materials within the upholstery of furniture, or related application, up to +50° C. Ideal for bonding latex, polyether, pu-foam, felt, clothed paper, cardboard, fibre boards, insulation with one another, or on wood, stone, steel, etc.

Extremely suitable for reparation purposes. Not recommended for bonding plasticizer surfaces. Adjustable spray pattern. Spray pattern webbing. Not recommended for bonding polystyrene foam.

DIRECTIONS FOR USE

The bonding materials should be dry, dust- and fat free. With furniture foams, both sides should be glued. At +20°C and 65% relative humidity a waiting time of 30 seconds is sufficient; de bonding can be joint almost immediately. With non-porous materials (like artificial leather), both sides should be glued. Dry for approx. 2 minutes before joining parts. Apply pressure.

TECHNICAL INFORMATION

Based on : SBR-rubber and resins in solution.
Specific weight : 0.8 ± 0.02 Kg/L.
Solids contents : 15 ± 1%.
Physical form : aerosol.
Viscosity : 50 – 200 mPa.s.
Colour : transparent yellow.
Drying time : approx.2 at +20° C glued 2-sided.
Open time : max 5 minutes.
Heat resistant : +50° C.

SHELF LIFE

1 year +20°C in unopened can.

CLEANING

VERDUNNER.

PACKAGING

400 ml aerosol.

Our processing advice is based on extensive research and practical experience. We can accept no liability for the results obtained and / or any damage resulting from the use of this product because of the wide range of materials and circumstances in which the glue is used. Nevertheless we would be pleased to advise you.
