

BIJLARD CITRONEL®

PRODUCT DESCRIPTION

Is a people-friendly cleaning and degreasing agent based on citrus terpenes to remove contact adhesive, ink, oil and grease.

DIRECTIONS FOR USE

CITRONEL is purely used for spraying, dipping, brush or brush and is designed for industrial applications in the removal of many types of ink, contact adhesives and silicone veil without a greasy layer behind. CITRONEL is also suitable for the removal of plant, animal and mineral oils and fats in those situations where no alkaline products may be applied.

PROCESSING

Bring CITRONEL on the object to be cleaned. Allow some time to react and remove the contamination with a lint-free cloth. Do not CITRONEL spray in to open flames and keep away from ignition sources. When used in epoxy coatings, plastics, coatings it is recommended prior to resistance testing.

PROPERTIES

Citronel is slowly evaporating, making the product more effective, efficient and cheaper than conventional products based on petrochemical hydrocarbons such as paint thinner, chlorine, benzene or acetone.

TECHNICAL INFORMATION

Basic Material	: citrus terpenes
Physical State	: Liquid
Color	: transparent
Scent	: citrus
Flashpoint	:> 50 ° C
Solubility in water	: insoluble
Ph value	: 7
Specific Gravity	: 0.8
Viscosity (mPa.s)	: 3.5

SHELF LIFE

Unlimited shelf life, spraycan is limited.

PACKAGING

500 ml aerosol, 5 liter tin drum or spray 500 ml. Tin Drum 200 liters

Our processing advice is based on extensive research and practical experience. We can accept no liability for the results obtained and / or any damage resulting from the use of this product because of the wide range of materials and circumstances in which the glue is used. Nevertheless we would be pleased to advise you.
